

# EQUIPMENT BUY BACK PROGRAM

A perfectly curated program to achieve the highest levels of sustainability in equipment recycling and refurbishing, offering clients' monetary value on all used and unwanted equipment.

Our program is designed to help clients make informed decision on the responsible practices of replacing machines by supporting the proper recycling, removal and dismantling of each unit; in addition to adding monetary value to our clients that can be used towards the purchase of new, more efficient and sustainable cleaning equipment.

We offer expert advice and detailed information into the current market value of your existing machines with the flexibility to explore our program at a no-charge and no-commitment agreement.

In supporting the responsible lifecycle of each machine, we strengthen the circular economy by taking unwanted equipment and bringing life back into the market by refurbishing or dismantling each machine to allow for proper recycling or re-use on all parts such as batteries, plastics, metal and electrics.

### **Equipment Assessment**

ICS Clean's certified equipment service manager will compile necessary information on qualified machines to evaluate its' current market value.

**01**

### **Evaluation**

Once accessed, ICS Clean will provide a comprehensive overview & evaluation to the standing value of each piece of equipment.

**02**

### **Reimbursement Allowance, Discount Proposal**

ICS Clean will offer a reimbursement allowance or additional discount offer for each piece of equipment which can be used towards a new purchase.

**03**

### **Removal**

ICS Clean will facilitate the removal of equipment and execute its appropriate recycling practices and/or send the unit(s) back to its origin for refurbishing.

**04**

#### **What Is Included In The Equipment Assessment?**

Our expert technicians will compile machine information such as, serial numbers, year of purchase, hour meter reading, general machine wear/damage and more. Once this information is received, it is processed through our systems to provide the most accurate market value.

#### **How Are Machines Evaluated?**

ICS Clean's evaluation process is simple; we will run machine specifications against current market values and internal manufacturing information to provide the best clear, fair overview to our clients factoring parts' value and refurbishing capabilities including general state and performance.

#### **What Manufacture Do You Partner With For Refurbishing Our Machines?**

In partnership with Nilfisk-Advance Canada, we have the ability to leverage additional expert advice on all units manufactured by this specific brand, allowing us to close the gap between recycling a product and executing professional refurbishment to support our circular economy and offer cost-efficient machines solutions at the quality that comes with the Nilfisk-Advance brand.

#### **How Can I Apply My Reimbursement Allowance Towards A Purchase ?**

Each machine assessed in our buy-back program will be assigned a monetary amount which can be used towards the purchase of a new machine. Our clients can only use (1) machine value towards (1) piece of new equipment. This amount will be applied in the form of an additional percentage discount or lump sum value at the time of order confirmation.
